

BLOOMBERG FOR INDIA

Financial and business professionals around the world rely on the Bloomberg Professional® service more than any other source to access real-time news, data and analytics—on a single platform.

LOCAL MARKET COVERAGE - GLOBAL PERSPECTIVE

Bloomberg provides local market pricing, data and tools designed specifically for Indian professionals combined with global market coverage—all with 24/7 global customer support.

- » **Exchanges** – Track all Indian exchanges and trading platforms across asset classes such as the Reserve Bank of India, National Stock Exchange, Bombay Stock Exchange, MCX Stock Exchange, Clearing Corporation of India, NSE Currency Derivatives and the India NCDEX equity exchange.
- » **Regional Securities (OTC INR <GO>)** – Access all OTC traded securities and real-time market data for India, perform price discovery on exchange-traded bonds and determine which bonds have offered the most liquidity historically (MOSB <GO>).
- » **Economic Calendars (WECO <GO>)** – Gain access to calendars of upcoming economic releases and those for commodity, government, central bank and industry data and events. Create custom calendars and set alerts.
- » **Futures Monitor (FMON <GO>)** – View all equity index and stock futures activity on a selected exchange. Track market sentiment and identify potential opportunities to profit from trends in trading activity.
- » **Derivative Contracts (SWPM <GO>)** – Allows you to price over-the-counter derivative contracts, so you can quantify your market exposures for a wide range of vanilla and exotic interest-rate swaps. OVML allows you to structure and price multi-leg foreign exchange options for a selected currency pair to manage risk, hedge your positions, and run scenario analysis for your FX option portfolios.
- » **FX Calculators (FRD <GO>)** – Obtain pricing information on India FX market, identify arbitrage opportunities, get rate forecasts by region and see trends in specific markets.
- » **Sales Dashboard (DASH <GO>)** – Integrate market-moving information with tools for targeting, prioritizing and interacting with relevant shareholders based on their investment activity, positions and patterns of interest. Through structured communication DASH & TMSG allows clients to analyze both sent and received ideas to determine an ideas historical performance as well as understand the impact of market events on their holdings.
- » **Portfolio & Risk Analytics (PORT <GO>)** – Gain deeper insight into your portfolios by analyzing your positions and active bets, historical performance and potential sources of future risk.
- » **Execution Management System (EMS)** – Execute through a multi-asset class trading platform that integrates Bloomberg exchange and broker data with equity, futures and options orders.
- » **Bloomberg Industries (BI <GO>)** – Get detailed data and analysis for more than 100 industry categories across 10 major industry sectors.
- » **Bloomberg Brief (BRIEF <GO>)** – Daily Economics Asia newsletter with insight, news and data from our team of dedicated economists.
- » **Local News Bureaus (TOP IN <GO>)** – Our Mumbai, New Delhi and Bangalore bureaus deliver local news with a global perspective placing the highest emphasis on accuracy, accountability and transparency in all our reporting.
- » **Bloomberg Anywhere®** – Access the Bloomberg Professional service anytime, anywhere from your mobile device.
